SOCIETY

INTERNATIONAL SPAD SENSOR WORKSHOP 2022

The 3rd International SPAD Sensor Workshop focuses on the study, modeling, design, fabrication, and characterization of SPAD sensors. The workshop welcomes all researchers, practitioners, and educators interested in SPADs, SPAD imagers, and associated applications, not only in imaging but also in other fields.

Devices | Architectures | Applications

The third edition of the workshop will gather experts in all areas of SPADs and SPAD-related applications, where over 40 invited speakers will animate three days of on-line study, information dissemination, and debates.

Location

Due to COVID-19 pandemic ISSW 2022 will be an online-only event.

Registration and Workshop Fee
