

ISSW 2022

The International SPAD Sensor Workshop

June 13 - 15, 2022

amu OSRAM

Devices | Architectures | Applications

The International SPAD Sensor Workshop focuses on the study, modeling, design, fabrication, and characterization of SPAD sensors.

The workshop welcomes all researchers, practitioners, and educators interested in SPADs, SPAD imagers, and associated applications, not only in imaging but also in other fields.

The third edition of the workshop will gather experts in all areas of SPADs and SPAD related applications using Internet virtual conference technology. Over 40 invited speakers will animate three days of study, information dissemination, and debates.
